A Glad With Pockets and Spurs

Nothing like it ever known,
So it is named Partain's "ALONE."

Almost every petal of each floret, clear to the tip, has pockets and spurs, resembling those on the long-spurred columbine. The florets are over four inches across, very ruffled, almost self-color, a very soft, melting light salmon pink. It is very early and blooms from bulblets.

"ALONE"

This Glad may start a new race of Glads and will be highly interesting for hybridizing purposes as well as being a beautiful Glad in itself.

Mr. Joe Partain, the originator, wishes us to introduce this "Pocket Glad" at \$100 per bulb of any size except No. 6's, which will be \$50. Bulblets will be \$10 each. He intends to maintain this price for some time.

As a rule, we cannot be responsible for a customer's success in germinating bulblets, but we will make the following offer in regard to bulblets of ALONE. With every cash order for a bulblet of Alone, we guarantee two bulblets the following season if your bulblet did not germinate. It is a good germinator and with care you should be successful the first season.

MERTON G. ELLIS BULB GARDENS
CANBY, OREGON

THREE NEW GLADS

introduced for the first this season 1930-31

GOLDEN CHIMES

(Originated by Merton G. Ellis)

This is a most exquisite ruffled glad. The florets are large, wide open and a very clear yellow with brighter yellow throat. It is a very well-shaped, graceful spike and is as beautiful as the name signifies.

BIRD OF PARADISE

(Originated by Mrs. George Crites)

This is a most gorgeous cerise pink, a worthy descendant of Purple Glory. The florets are large, wide open and well-placed. It attracts much attention for its unusual coloring and will be a great cut flower in the future.

COMMODORE

(Originated by Mrs. Merton G. Ellis)

This is a gorgeous cut-flower either alone or arranged with Madame Mounet-Sully. Commodore is a very clear, bright-red with white throat, just the converse of Sully, which is white with bright-red throat. Such a combination is very striking. Commodore makes a graceful spike, many florets open and is a very satisfactory glad. It is somewhat similar to Lady Macbeth but an improvement in many ways. It is a better propagator, great germinator, produces a better spike, is considerably earlier and a healthier bulb.

SPECIAL GRATIS OFFER

With a cash order of \$50 or more you may have FREE:

One Bulblet of **Alone**, **Golden Chimes** and
Bird of Paradise
and

Three Blooming size Bulbs of **Commodore**.

With a cash order of \$25 or more you may have one bulblet of your choice of ONE of the above listed varieties: **Alone**, **Golden Chimes** or **Bird of Paradise**, and two blooming size bulbs of **Commodore**.
